Communicate with impact: developing and delivering your research story

- Have an exciting research story that you want to tell people about?
- Wandering who your target audience is?
- Wanting to explore different ways of communicating with your audience?
- Thinking about how your body language and voice can enhance your communication?

Then this programme is for you!

This interactive programme is your perfect opportunity to refine your communication skills and create a concise, engaging research story tailored for different audiences. Explore strategies for understanding your audiences' perspective and crafting a compelling story structure.

Next, practice delivering your research story and receive valuable feedback from your peers to boost your confidence and refine your storytelling. Lastly, learn how to use your body language and voice to capture your audience's attention to get the most impact. Join us and master the art of communicating your research, with impact, in just three minutes!

By the end of the programme you will have developed an exciting research story and the delivery skills to present it with impact!
